Skill

ASP.Net	1.5+ yrs
Mongodb	1+ yrs
SqlServer/ MySQL	1+ yrs
HTML/ CSS	2+ yrs.
Reactjs/ Typescript	1+ yrs.
Redis	1+ yrs.
Elasticsearch	1+ yrs.
Git	2+ yrs.
Docker/ Kubernetes	1+ yrs.

Biography

Results-driven IT professional with 2 years of software development experience. Passionate about innovation and staying up-to-date with industry trends. Committed to contributing to impactful projects and making a positive difference through technology. Constantly seeking growth and learning opportunities in the ever-evolving IT landscape.

Work experience

Full Stack Developer (Microservices Architecture)
Viettel Group

10/2019 - today

Built and maintained scalable microservices-based systems using ASP.NET (backend) and ReactJS (frontend).
Designed RESTful APIs and integrated services within distributed architecture. Utilized MongoDB for flexible data modeling and optimized database performance.
Containerized services with Docker and deployed on Kubernetes (K8s) for orchestration, scalability, and fault tolerance.
Implemented CI/CD pipelines using Git workflows to automate testing, integration, and deployment.
Improved system reliability and maintainability by following clean architecture and DevOps practices.

Full Stack Developer
Quang Trung Software Company

12/2018 - 09/2019

Designed and developed scalable full-stack web applications using Node.js, Reactjs, and MySQL.
Implemented RESTful APIs, authentication (JWT), and efficient database schemas, improving data processing performance.
Developed dynamic and responsive user interfaces, enhancing user experience and application usability.
Worked in Agile teams, contributed to code reviews, debugging, and continuous integration processes.

Intern - Backend Developer
FPT Software

06/2017 - 12/2018

Assisted in developing and maintaining backend services for web applications. Collaborated with team members to design APIs and handle database operations.
Participated in debugging, testing, and improving system performance.
Gained hands-on experience with backend technologies and real-world development workflows.

Projects

- Real-time Chat Application (Personal Project)
 - Built a real-time chat application using ReactJS and ASP.NET Core.
 - Implemented WebSocket for real-time messaging.
 - Managed user data with MongoDB and ensured secure
 - Containerized application using Docker and deployed on cloud infrastructure. authentication.

Interests

- ▶ Football
- ▶ Guitarist
- ▶ Fitness
- ▶ Cooking
- ▶ Travel

▪ E-commerce Website (Student Project)

- Built a simple e-commerce website using ASP.NET for backend and ReactJS for frontend.
- Implemented basic features such as product listing, product details, shopping cart, and order management.
- Used MongoDB to store product and user data.
- Created RESTful APIs for communication between frontend and backend.
- Practiced using Docker for application deployment.

Education

2025 - 2028

Information Technology

University of Information Technology, VNU-HCM

Distance Learning Program
